Rujuta Phaltankar

Full-Stack & AI Developer | Computer Science & Engineering Student
Pune, Maharashtra | rujuta.phaltankar@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Third-year CSE student who ships end-to-end products: React/TypeScript front-ends, Node.js and FastAPI back-ends, and LLM-powered features with safety and testing built in. Seeking software engineering / web development internships.

EDUCATION

DES Pune University 2024 – 2028
B.Tech, Computer Science & Engineering | CGPA: 8.6

PROJECTS

Wander — AI Smart Travel Planner | React, TypeScript, Node.js, Express, Prisma, SQLite | Live demo | Code
- Built a full-stack planner that discovers places by budget and generates day-by-day itineraries with an LLM (Groq/OpenAI/Anthropic).
- Added map-based exploration, budget tracking, reviews, weather data, JWT auth, and an admin panel.
- Shipped with Docker Compose, GitHub Actions CI, Jest/Supertest API tests and deployment docs; frontend deployed on Vercel.

MindMate AI — Mental Wellness Platform | React, Flask, MongoDB, Tailwind | Live demo | Code
- Built mood tracking, private journaling, an empathetic AI companion (SSE streaming) and an anonymous community.
- Implemented a dual-layer crisis-safety classifier, consent-gated AI, JWT refresh/revocation, rate limiting and data export/deletion.
- Tested with pytest and Vitest; CI via GitHub Actions; Docker-ready.

SpendWise AI — Personal Finance Intelligence | React, Node.js, MongoDB, FastAPI, scikit-learn | Live demo | Code
- Built natural-language expense entry, receipt OCR, budgets, spending prediction and anomaly detection (median/MAD) via a Python ML microservice.
- Kept all numbers deterministic and used the LLM only to explain facts; wrote 89 backend and 10 ML unit tests.
- Containerised the full stack with Docker Compose and Nginx.

Samarth-AI — Scheme Discovery | React, Node.js, MongoDB, Pinecone, Groq | Code
- RAG-based platform helping people with disabilities in India find eligible government schemes.

DevPilot AI — Developer Productivity Platform | FastAPI, SQLAlchemy, React 19, TypeScript, Tailwind | Code
- Built an authenticated (JWT) developer productivity platform with Anthropic API integration.

TECHNICAL SKILLS

Languages: Java, C++, Python, JavaScript, TypeScript, SQL
Web & Backend: React, Vite, Tailwind CSS, Node.js, Express, FastAPI, Flask, REST APIs, JWT
Data & Cloud: MongoDB, PostgreSQL, SQLite, Prisma, AWS, Docker, GitHub Actions, Git
AI: LLM APIs, RAG, embeddings, vector search (Pinecone), prompt engineering

CERTIFICATIONS & ACTIVITIES

- AWS Prompt Engineering certification (June 2026)
- Member, AWS Club, DES Pune University
- Participant, Pragyantra 2026 hackathon; volunteer, IEEE ETFI-2026
- Winner, Indigo Saga Dance Competition, Mood Indigo 2025
